SOLAR POWER

Here are comments made by
POWUR customers –

PETER BURKE
Homeowner

"The main reason we chose to go solar was to make the planet cleaner and lower our utility bills!"

RAFAEL ACOUSTA
Homeowner

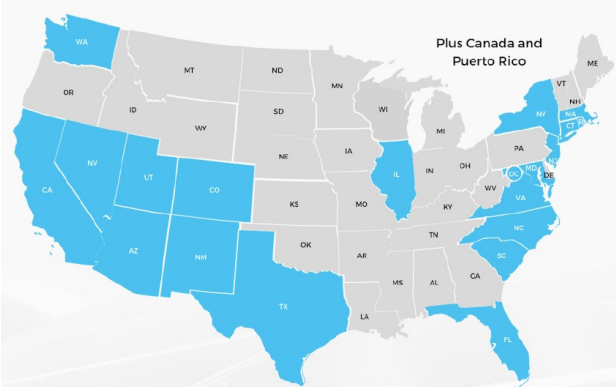

"Clean energy is the solution to climate change. Every homeowner should do it. I hope that my neighbors will join the clean energy movement."

DAVID CANTERO
Homeowner

"My utility bill used to be \$80 a month on dirty energy, now it's \$24 on clean energy... and it cost absolutely NOTHING, ZERO DOWN to get it installed!"

WHOLE HOUSE FAN

Here is what Casey in Salt Lake City said in 2015

"I bought my whole house fan in June of 2015. As for the fan and overall system, I love it.

I live in Salt Lake City and prior to that I had lived in the Midwest where lots of houses have whole house fans, but all of them are super noisy with the loud motor sitting right over the opening in the ceiling. And the opening has those rattling intake shutters.

Not so with this new setup - the fan itself is 8-10' feet away from the attic opening and it uses a quiet flexible duct to pull air up from our rooms. It is whisper quiet as far as motor sounds go - the only thing you hear is the air moving.

And boy, can it move air if you need it to!

Generally I keep it at about half to 3/4 speed unless I really need to cool things down fast, then jet engine air movement at full power does the trick.
